-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10 and 59-61, drawn to a method and system for syndication of content, classified in class 715, subclass 516.
- II. Claims 11-30 and 62-63, drawn to a method and system for parsing, extracting and transforming data coded in a markup language, classified in class 715, subclass 513.
- III. Claims 26-40, drawn to a method and system for displaying a tree structure of a web page and dragging the contents of the tree structure into a template, classified in class 715, subclass 530.
- IV. Claims 41-45, drawn to a method for a content engine for managing and delivering localization and personalization rules for content and media assets, classified in class 715, subclass 500.1.
- V. Claims 46-58, drawn to a system and method for generating content by producing content targeted for a specific platform or receiver based on stored meta-data or run-time properties related to the content, classified in class 715, subclass 901.

The inventions are distinct, each from the other because of the following reasons:

Inventions (I), (II), (III), (IV), and (V) are related as subcombinations disclosed as usable together in a single combination. The

subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention (II) has a separate utility such as a method of transforming a markup language document. Invention (III) has a separate utility such as a system and method of displaying the contents of a web page. Invention (IV) has a separate utility such as a method for managing and delivering content localization and personalization rules. Invention (V) has a separate utility such as a method for generating content targeted for a specific platform or receiver based on meta-data or run-time properties related to the content. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group (I) is not required for Group (II) Group (III), Group (IV) or Group (V), restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

Art Unit: 2176

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Laurie Ries whose telephone number is (571) 272-4095. The examiner can normally be reached on Monday-Friday from 7:00am to 3:30pm. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph Feild, can be reached at (571) 272-4090.
